

Technical Data Sheet

Application fields: Self-adhesive collar for sealing openings through the airtight level, e.g. for vapour barriers, sarking membranes.

Adhesive sleeve

Material: special paper covered with PE film / polyacrylate adhesive glue
Colour: white
Thickness: approx. 0.35 mm
Adhesive force: > 40N/25mm
Reißkraft: > 150N/25mm
Temperature resistance: -40 °C to +80 °C
UV resistance: short-term

Flexible sealing grommet

Material: EPDM
Colour: black
Hardness: 60 ± 5 Shore A (DIN ISO 48)
Density: 1.15 g / cm³ (DIN ISO 1183-1)
Tensile strength: 11.6 MPa (DIN ISO 37)
Temperature resistance: -30 °C to +100 °C
UV resistance: very good

Storage: cool and dry
UV protected

Processing temperature: +5 °C to +40 °C

Processing notes: The area must be dry, stable and free of dust and release agent.
Folds and kinks must be prevented.
