

## Technical Data Sheet

**Application fields:**

Undercoat for optimal adhesion. EISEDICHT<sup>®</sup> products with acrylate, butyl and bitumen-rubber adhesive surfaces to be attached to all absorbent mineral substrates such as plaster, concrete, cement plaster, aerated concrete, brick and sand-lime brick masonry with smooth joints, as well as on wood materials and wood.

**Basis:**

aqueous acrylate-polymer dispersion

**Colour:**

transparent

**Viskosität:**

approx. 1000 mPa.s according to Brookfield (02/20min<sup>-1</sup>) at 20 °C

**Density:**

approx. 1.02 g/cm<sup>3</sup> (EN 542)

**Airing time:**

approx. 15 min.

**Processing amount:**

approx. 100 g/m<sup>2</sup> (depending on carrier material)

**Storage:**

cool and dry

keep away from direct sunlight

at temperatures +15 °C to + 25 °C

**Processing temperature:**

+5 °C to +40 °C

**Solvent-free:**

yes

**Processing notes:**

Please observe the notes in the safety data sheet.
