

Technical Data Sheet

Areas of application:

Prefabricated system connection tapes for creating a permanently airtight and flexible connection of a wide variety of surfaces, edges and corner situations in the building sector. Thanks to the central slit in the back, the tape is easy to apply. The Tyvek connection tape is suitable for interior and exterior use with vapour barriers or retarders as well as underlayment membranes.

Base material

Material: HDPE carrier film (Tyvek®) / polyacrylate adhesive
Colour: white
Thickness: approx. 0.2 mm Tyvek® carrier film / approx. 0.12 mm pressure-sensitive adhesive
Adhesive strength: >25N/25mm
Tensile strength: >25N/25mm
Temperature resistance: -30 °C to +100 °C
UV resistance: very good

Storage: cool and dry

Working temperature: +5 °C to +30 °C

Application instructions: The surface must be dry, load-bearing and free of dust and release agents. Avoid folds, creases and tensile stresses.
