

Connection tape Vlies-Butyl

Technical Data Sheet

Areas of application:

Prefabricated system connection tapes for creating a permanently airtight and flexible connection of a wide variety of surfaces, edges and corner situations in the building sector. Thanks to the central slit in the back, the tape is easy to apply.

The non-woven butyl connection tape can be plastered over and is suitable for use on walls to be plastered, such as fine wood fibre boards, wood-based panels, OSB boards, masonry or concrete.

Base material

Material:

Synthetic tangled fleece / butyl rubber

Colour:

grey

Thickness:

approx. 1 mm fleece / approx. 1 mm butyl adhesive

Butyl density:

approx. 1.5 g / cm³ (DIN EN ISO 10563)

Temperature resistance:

-40 °C to +100 °C

Outdoor exposure:

very good

Storage:

cool and dry

Processing temperature:

+5 °C to +30 °C

Bitumen compatibility:

yes

Application instructions:

The surface must be dry, load-bearing and free of dust and release agents. Porous substrates such as concrete, plaster, etc. must be treated in advance with BUBI LF Adhesion Primer or Eisedicht Spray Primer. Avoid folds, creases and Tensile stresses must be avoided.
