

Technical Data Sheet

Application fields:

Self-adhesive extremely flexible butyl elastomer strap with a HD-PE substrate. Used to create an airtight and moisture-tight connection to components e.g. vapor barrier or underlays.

Adhesive sleeve

Material:

HD-PE (High density Poly-Ethylene) / Butyl

Colour:

black / white

Thickness:

approx. 1,6 mm

Elasticity:

approx. 160 % (2,6 x initial length)

Temperature resistance:

-30 °C bis +80 °C (Short-time upto 100 °C)

Storage:

cool and dry

no direct sunlight

Temperatures of +5 °C to + 25 °C

closed approx. 24 months

Processing temperature:

+5 °C to +40 °C

Processing notes:

The area must be dry, stable and free of dust and release agent. Folds, kinks and tensile stresses must be prevented.
