

## Technical Data Sheet

### Areas of application:

Silicone spray for mineral oil-free lubrication and insulation of rubber, plastic, wood, leather, metal, glass, textile, etc.

### Properties

- protects against moisture, water, dust and cannot resinify
- does not form greasy or adhesive films
- is a lubricant, release agent, insulating spray and maintenance spray
- allows lubrication without mineral oil where oil or grease is unsuitable
- is compatible with almost any material
- is suitable for indoor and outdoor use
- Enables material-compatible care
- Free of environmentally toxic substances and chlorinated hydrocarbons
- contains ozone-neutral propellant

### Technical Data

|                                |                   |
|--------------------------------|-------------------|
| <b>Colour:</b>                 | colourless        |
| <b>Odour:</b>                  | odourless         |
| <b>Temperature resistance:</b> | -50 °C to +200 °C |
| <b>Contents:</b>               | 200 ml            |

**Storage:** cool and dry

**Processing temperature:** 0 °C to +30 °C

**Directions for use:** Shake well before use. Spray evenly onto clean surfaces at a distance of 25-30cm. Wipe off excess product. Repeat application as necessary.
